

RoHS PROCEDURE

This document summarizes MuxLab's RoHS procedure.

A) North America and Non-EU Members:

If a product is shipped to/in North America or non EU members **with** the purchase order specifying "RoHS Compliance Required", then the product shipped will be compliant. RoHS compliance is indicated on the paperwork (Packing slip and commercial invoice) and a square black/white RoHS label is also applied to the overpack carton.

If a product is shipped to/in North America or non EU members **without** the purchase order specifying "RoHS Compliance Required", then the device will not be compliant, and there will be no indication that it does not meet RoHS compliancy (no part label, nothing noted on paperwork – invoice, etc.).

B) Europe (EU members):

If a product is shipped to Europe (EU members), the product **will always** be RoHS compliant. RoHS compliance is indicated on the paperwork (Packing slip and commercial invoice) and a square black/white RoHS label is also applied to the overpack carton.

For further information or with help in placing your order please contact MuxLab Customer Service at 877-689-5228 ext 221.
