

MuxLab Streamlines Stereo Audio Cabling via Cat5 Twisted Pair

Stereo Audio Balun Simplifies AV Connections

Montreal, Canada — MuxLab Inc (www.muxlab.com), a designer and manufacturer of security video and audio-video connectivity solutions for copper twisted pair, announces its latest addition to its security video and AV connectivity portfolio.....**The Stereo Audio Balun (500027)**.

Developed for the home and office markets, the Stereo Audio Balun allows one line level analog stereo audio channel to be connected via Cat5 twisted pair cable, thus replacing two standard audio cables.

Used in pairs, the Stereo Audio Balun has a bandwidth of 60Hz-20KHz and is designed for mid-range audio applications such as integrated TV systems, AV monitors, intercom systems and other midrange frequency audio equipment.

The product features built-in left/right RCA cable leads to allow AV equipment to be connected directly to the structured cabling system and supports up to 5,000 ft (1.5km) via Cat5 cable.

The product works in conjunction with MuxLab's other analog audio baluns and hubs for a total cabling solution.

For more information, please visit the MuxLab website (www.muxlab.com) or contact MuxLab at +1 514-905-0588, or videoease@muxlab.com.
