

MuxLab Streamlines Hi-Fidelity Audio Cabling via Cat5 Twisted Pair

Stereo Hi-Fi Balun Simplifies AV Connections

Montreal, Canada — MuxLab Inc (www.muxlab.com), a designer and manufacturer of security video and audio-video connectivity solutions for copper twisted pair, announces its latest addition to its security video and AV connectivity portfolio.....**The Stereo Hi-Fi Balun (500028)**.

Developed for the home and office markets, the Stereo Hi-Fi Balun allows one line level analog stereo audio channel to be connected via Cat5 twisted pair cable, thus replacing two standard audio cables.

Used in pairs, the Stereo Hi-Fi Balun has a bandwidth of 20Hz-20KHz and is designed for high-fidelity audio applications where full spectrum audio frequency response is required. Applications include custom audio systems, retail audio distribution systems.

The product features built-in left/right RCA cable leads to allow AV equipment to be connected directly to the structured cabling system and supports up to 3,250 ft (1 km) via Cat5 cable.

The product works in conjunction with MuxLab's other analog audio baluns and hubs for a total cabling solution.
