Advanced Home Environments Inc. (MN) recently completed a custom AV installation based around MuxLab's Component Video/Digital Audio Balun (500051) and Rack Mount Balun Chassis 16 (500900).

The 500051 provide the Cat5E interface between three (3) AMX/Autopatch 32x32 HDTV/Component Matrix Switch and sixteen (16) display screens. The AutoPatch uses a separate chassis for each of the 3 component signals (Y, Pb, Pr).

According to Brian Gunderson, Director of Engineering of Advance Home Environments, "It looks fantastic with the 500900 holding the baluns together, it is a perfect fit!"

For more information about this application please contact Mr. Brian Gunderson at 651.731.3900 or at briang@advancedhome.biz
